Acoustically insulated fans

Caissons de ventilation insonorisés

Schallisolierte kanalventilatoren

Канальные акустические вентиляторы

Acoustically insulated duct fans for ventilation and air conditioning systems. Used for the air supply or extract. Additional insulation of the fan box reduces noise level to the surroundings. Not suitable for polluted air, aggressive and explosive gases.

Impeller: backward curved wings.

Motor: external rotor, direct transmission, long-serving bearing with no maintenance requirements.

Housing: made of galvanized steel, housing frame made of aluminium profiles, perforated sheet, which reduces noise level in duct systems.

Sound insulation: stone wool, 25 mm thickness.

Low noise level.

Schallisolierte kanalventilatoren, die für Lüftungs- und Klimaanlage bestimmt sind, werden an Luftführungs Kanäle angeschlossen. Sie werden für Zuluft und - Abluft verwendet. Nicht geeignet für die Beförderung von verschmutzter Luft, aggressiven, explosiven Gasen.

Lauftrad ist rückwärts gekrümmt, aus verzinktem Stahl.

Der Motor: Außenrotor, integrierter Thermokontakt-Motorschutz, dauerhafte, keine Pflege erfordernde Lager.

Das Gehäuse: aus verzinktem Blech, Gehäuserahmen aus Aluminiumprofil.

Schallisolation: Steinwolle mit verstärkter Oberfläche, 25mm dick, nicht entzündbar.

Niedriges Geräuschniveau.

Les caissons de ventilation pour gaines destinés aux systèmes de ventilation et de climatisation. Ils s'utilisent en apport d'air neuf ou en extraction. Ces caissons ne conviennent pas au transport d'air fortement pollué, de gaz agressifs ou explosifs.

Turbine : pales incurvées vers l'arrière.

Moteur : à rotor externe, entraînement direct avec protection thermique intégrée (PTO), roulements graissés à vie ne nécessitant pas d'entretien.

Enveloppe : tôle d'acier galvanisée, cadre de l'enveloppe en profilé d'aluminium.

Isolation acoustique : laine de roche surface renforcée, 25 mm d'épaisseur.

Faible niveau de bruit.

Канальные акустические вентиляторы для систем вентиляции и кондиционирования, подключаются к воздуховодам. Эксплуатируются в целях подачи и вытяжки воздуха. Не используются при транспортировке загрязнённого воздуха, агрессивных, взрывоопасных газов.

Крыльчатка: загнутые назад лопасти, оцинкованная сталь.

Двигатель: наружный ротор, встроенные термодатчики двигателя, не требующие ухода подшипники с длительным сроком службы.

Корпус: оцинкованной жести, рама корпуса из алюминиевого профиля.

Звукоизоляция: минеральная вата с усиленной поверхностью, толщиной 25 мм, негорючая.

Низкий уровень шума.
